Predictable.

For companies with people in them™  
[sprint.com/business](http://sprint.com/business)

We're guessing that you'd rather run your business than untangle phone and data plans.

That you prefer flexibility, rather than rigid constraint. And that value for money comes pretty high on your agenda.

Are we right? Then let's talk Sprint Fusion Business Plans. Here's the low-down, followed by the low prices.

## Simple

### Pool your data or go unlimited.

Combine your data – from phones, tablets and mobile broadband devices – into a shared pool of data. Everyone gets what they need, virtually whenever, wherever.

Or upgrade any of your smartphones to unlimited data. You're free to choose what's right for you.

However you roll, we make it easy to understand what you're buying and how much you're paying. We know that if we keep things simple, it's simple for you to choose Sprint every time around.

## Scalable

### Does size matter? Not to us.

Your growing business won't look the same in a few months, let alone a few years.

So you need a plan that changes as you change. One that accommodates your ebbs and flows, but always lets you know where you stand, without penalizing and perplexing plan requirements.

With Sprint Business Fusion Plans you can add more devices or data when you need them – just ask.

## Predictable

### Look after the dollars and cents...

Cash-flow counts. That's why our plans are built with your business in mind.

And why when you add a line you know the price, and what will be on your next bill.

So flexible, yes. But competitive?

Yes, competitive too. Sprint Business Fusion Plans are priced to win your business now, and keep you happy in the future – wherever that future takes you.
